

DXC Integration for Microsoft Teams and Cornerstone

Virtual Classroom connector

Simplify your training sessions by bringing them online. Easily and seamlessly schedule, launch and track attendance at virtual classroom sessions with DXC Technology's Microsoft Teams and Cornerstone vILT connector.

Business case

For many of us, remote work has become the normal way of working. Remote education and training have also steadily become the de facto standard in most organizations, and a major proportion of traditional classroom-based training has been converted, step by step, into virtual training sessions — also known as “virtual Instructor-Led Training,” or vILT. With most organizations transitioning to such virtual training, efficiency in digital scheduling, launch and attendance tracking of training sessions have become more necessary now than ever before.

DXC Technology's standard connector for Cornerstone and Microsoft Teams helps organizations easily and effectively organize, manage and run virtual learning sessions, and seamlessly track attendance in Cornerstone Learning Management System (LMS). DXC enables the seamless integration of Microsoft Teams with Cornerstone, resulting in a host of efficiencies for your remote training programs. DXC Integration for Microsoft Teams and Cornerstone is quick to set up and requires no training to operate.

Key features

DXC Integration for Microsoft Teams and Cornerstone offers the following key features:

- Create/update instructor and session information directly within your Cornerstone portal and Microsoft Teams will be automatically and transparently updated.
- Instructors and attendees can launch courses directly from Microsoft Teams (using MS Teams, Outlook, or an email invite) or from within Cornerstone.

Key benefits

- **Time and cost savings** through smart process automation
 - **Seamless and consistent user experience** for administrators, instructors and attendees
 - **Faster and more accurate tracking** of training completion by attendees
 - **Increased efficiency and reduced errors**, thanks to avoidance of duplicate processes and effort
 - **Quick implementation** — no training required
 - **Fully integrated** into your Outlook and Microsoft Teams applications
-
- Attendance data is sent back automatically from Microsoft Teams to Cornerstone, thereby facilitating training completion monitoring and tracking.

Requirements

To set up and operate DXC's solution, you will need the following:

- Cornerstone LMS
- Cornerstone's vILT Connector from the Edge Marketplace
- Cornerstone's REST APIs
- Microsoft 365 or similar plan that includes MS Teams

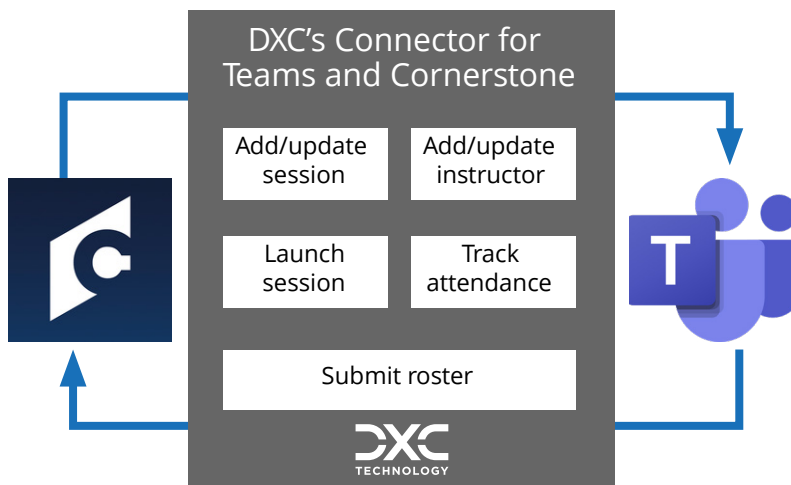

MS Teams integration in action

Once DXC Integration for Microsoft Teams and Cornerstone has been set up and configured, virtual classrooms can be seamlessly scheduled, run, monitored and tracked — exactly like any other training session.

- Administrators or instructors can create and manage MS Teams sessions like any other session.
- Instructor gets an Outlook invite with a link to the virtual classroom.
- Instructor and trainees can launch the Teams session from within Cornerstone or from their Outlook/Teams calendar.
- Attendance data is collected in real time, as soon as trainees join the session.
- Attendance data is updated in Cornerstone LMS after the session is over.
- The session roster can be updated automatically or based on the instructor's input.

Attendance criteria (e.g., time spent on each session) can be configured to meet specific policies or regulatory requirements. Multipart sessions are also supported.

Similar to session scheduling and attendance, auditing and reporting are also seamlessly available in your own Cornerstone platform, without any need for custom or external components.

About DXC Technology

DXC Technology (NYSE: DXC) helps global companies run their mission critical systems and operations while modernizing IT, optimizing data architectures, and ensuring security and scalability across public, private and hybrid clouds. With decades of driving innovation, the world's largest companies trust DXC to deploy our enterprise technology stack to deliver new levels of performance, competitiveness and customer experiences.
